Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown et al 5,377,877.

Brown et al show (figure 19) a peripheral mounting flange 103, head 5c, sleeve 7c and first through seventh surfaces (figure 21).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al.

Brown et al lack the flange having eight through tenth surfaces. It would have been an obvious matter of design choice to modify the Brown et al flange having eight through tenth surfaces, since such a modification would have involved a mere change in

the number/shape of a component. A change in number/shape of a component is generally recognized as being within the level of ordinary skill in the art.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maddox et al 6,216,916 in view of Suffa 5,904,275.

Maddox et al show a discharge structure comprising showing a pump 60, discharge conduit 200 and valve 80. Maddox et al lack the valve a resilient pressure actuable valve and a restraint structure. Suffa shows a discharge structure having a resilient pressure actuable valve 4 and a restraint structure 6. It would have been obvious to one of ordinary skill in the art to have substituted the Maddox et al valve with a resilient pressure actuable valve and a restraint structure as taught by Suffa as an alternative equivalent means for controlling flow at an outlet from a discharge structure.

Response to Arguments

Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.
